

Former Terry's Factory

Client:
P J Livesey Group

Project Location:
York, Yorkshire

Project Type:
Refurbishment

Project Size:
163 Apartments

The iconic main building of the old Terry's factory in York has been redeveloped into high quality, luxury apartments and penthouses.

Located next to York Racecourse, this award winning project created 163 new dwellings from the 16700m² building spread over 5 storeys.

6mm Isorubber Base was used as a simple but robust way to achieve the high level of performance that this project required.

"The team at Thermal Economics has been fantastic to work with. Their proactive approach to supporting clients and making sure the products used meet our exact needs was extremely helpful."
Gareth Whittaker, Commercial Director for P J Livesey.

Product Used: 6mm Isorubber Base
