

Regency Heights

**Client:**  
Fairview New Homes

**Project Location:**  
Park Royal, London

**Project Type:**  
New Build

**Project Size:**  
174 Apartments

As part of a £26 Billion regeneration scheme this project includes the impressive Baronet House which provided 174 high specification apartments over 26 floors.

Fairview New Homes required a high performance acoustic product that could be used beneath a luxury vinyl floor finish and ceramic tiles.

3mm Isorubber Top was specified as the acoustic overlay in this project as it does not contain any plasticizers making it suitable for use below vinyl.

Isorubber Top is the main acoustic component in Robust Details E-FC-9 and E-FC-10 and as such is proven to provide excellent acoustic performance.

Product Used: 3mm Isorubber Top
